Digital Talent Management Platform – UX Research Documentation

NAVEEN KUMAR N
UI/UX Intern

Project Overview:

The Digital Management Platform is designed to help organizations manage interns and employees more effectively. The platform allows managers to assign tasks, monitor progress, and evaluate performance in a centralized system. It also helps interns easily track assigned tasks, submit work, and receive feedback from managers.

Problem Statement:

Many organizations manage interns and employee tasks using multiple tools such as spreadsheets, emails, and chat platforms. This makes it difficult to track task progress, monitor performance, and ensure clear communication between managers and interns. A centralized digital platform can simplify task management and improve productivity.

UX CORE PROBLEMS:

- Too many complex dashboards.
- Manager or Team Lead cannot quickly identify the right employee for a project.
- Employees cannot track their own growth easily.
- Performance data is confusing.
- Skill management is not visual or interactive.

Target Users:

- **Intern/Employee**

Responsibilities:

- 1.View assigned tasks
- 2.Submit completed work
- 3.Track task progress

Needs

- 1.Clear dashboard
- 2.Easy task submission

- **Manager/Team Lead**

Responsibilities:

- 1.Assign tasks
- 2.Monitor team progress
- 3.Review submissions

Needs

- 1.Performance tracking
- 2.Task management tools

- **Admin/HR**

Responsibilities:

- 1.Manage users
- 2.Monitor performance
- 3.Generate reports

Needs

- 1.Centralized management system

Detailed User Personas:

1.HR/Resource Manager:

Name:Rahul

Age:35

Experience:12 years in HR & Resource Management

Work Environment:Mid-size IT service company managing 100+ employees

Role:

Responsible for managing the company's workforce by assigning the right employees to suitable projects while ensuring balanced workloads and efficient use of available talent.

Goals:

Ensure the right employees are assigned to the right projects while maintaining balanced workloads across teams, minimizing bench time and improving overall productivity through effective talent management.

Daily Task:

Reviews incoming project resource requests and assigns employees based on their skills, experience, and availability.

Weekly Task:

Analyze workforce utilization reports to identify overload or underutilized employees and adjusts project allocations accordingly.

Project-End Responsibility:

Collects feedback from project managers and analyze skill gaps identified during the project to organize future training programs.

2.TEAM LEADER/PROJECT MANAGER:

Name:Naveen

Age:32

Experience:7years in software development and project management.

Work Environment:Works in an agile development team handling multiple client-based software projects.

Role:

Responsible for managing project execution, monitoring team productivity, and ensuring project milestones are completed on time.

Primary Goal:

Successfully deliver projects by managing team performance. Tracking progress, and ensuring the team performance, tracking progress, and ensuring the team has the right technical resources to meet deadlines.

Daily Task:

Monitors daily progress of team members and reviews task updates to ensure the project schedule is maintained.

Weekly Task:

Conducts sprint reviews to evaluate team performance and identify technical issues affecting project progress.

Project-End Responsibility:

Submits performance evaluations for each team member based on productivity,collaboration. And work quality.

3.Employee/Intern:

Name:Yaswanth

Age:26

Experience:3 years as a Software developer

Work Environment:Works in a collaborative software development team using agile methodologies to deliver client projects.

Role:

Responsible for completing assigned development tasks efficiently while continuously improving technical skills.

Primary Goal:

Complete project tasks successfully while improving technical expertise and tracking personal career growth.

Daily Task:

Works on assigned coding tasks, updates project progress, and logs daily working Hours.

Weekly Task:

Reviews manager feedback and monitors personal performance metrics to improve productivity.

Project-End Responsibility:

Analyzes project feedback and identifies skills that need improvement for future projects.

User Flow:

Key Features

The main features of the system

Task Management:

Managers can assign tasks and track completion.

Progress Tracking:

Users can monitor task progress and performance.

Admin Management:

Admins can manage users and system settings.

UX Opportunities

How UX Design can improve the system

- 1.Clear task prioritization
- 2.Progress tracking dashboard
- 3.Deadline reminders
- 4.Easy task submission
- 5.Transparent feedback system

Conclusion

This research highlights the need for a centralized platform that simplifies task management and improves communication between interns and managers. The proposed UX approach focuses on clear navigation, simple task management, and transparent performance tracking.
